Installation Instructions

- Locate CTC Joint in the tile surface directly above joints in the sub-floor.
- Trowel setting material making sure there is full coverage over the entire leg. To ensure adequate coverage at the leg edge, the mortar bed may be feathered off both sides of the joint.
- Set tile up against the joint making sure that the top edge of the CTC Joint is flush or slightly (1/16") below the top of the tile.
- Grout surface as usual.
